Croatia Transfers company Johnnie.hr with this press release announces launching of new services.

Croatia Transfers company Johnnie.hr launches new services.

Johnnie.hr one of the leading companies offering taxi services, airport transfers and online booking of transfers in Croatia to various travel destinations, has launched new online services on their webpage <http://www.johnnie.hr/>.

Speaking at press conference in Zadar to announce the launch of their new services Mr. Johnnie Kazija, the founder of the company said that the company has been into **Croatia transfers** for over 7 years but the service range has been widened and the services would be offered to more global customers from here on (Spring/Summer 2009). He mentioned that after airlines company Ryanair has announced launching new routes from Edinburgh Airport to Zadar Airport, the company needs to be ready to handle all new Croatia airport transfers that will be a big surprise to all Croatia transfer companies like a large volume of work in a quick turn-around time.

Responding to this rising demand of **Croatia transfers** johnnie.hr has already increased the team size and they also have to increase the number of minibuses with the carrying capacity of 8+1 persons, as well the spectrum of transfer services. The taxi drivers are experienced local staff who are fluent in English, German and Italian and have delivered several thousands of passengers across the Croatian Adriatic coast and wider.

Replying to journalists question on the differentiators of the company, Mr. Johnnie Kazija said that the Croatia transfer company offers a wide range of taxi transfer services under one roof. This includes taxi transfers from Split airport, taxi transfers from Zadar airport, and all other regular Croatia transfer services. The company also ensures that the Taxi drivers are on time with the timetable on the airport and they will wait for the client right at customs exit/international arrivals with a placard and the clients name on it. Mr.Kazija said that being a professional company, johnnie.hr has to handle huge numbers of transfers that come from online **Croatia transfers** booking.

Transfers in Croatia & Pricing

Speaking on the taxi pricing margins, Mr. Kazija said that the company executes all assignments as per the prevailing market rates sometimes even lower then the competition. The Croatia transfer prices are charged based upon the the clients arrival to the destination point in Croatia. He said that the rates are competitive and clients are happy with the rates offered. Though there are pricing pressures, the company does not provide transfers in Croatia below certain rates which are mandated by the management of the high prices of fuel. Croatia Transfers discounts are offered to clients who give significant amount of transfers to us.

He mentioned that the company has aggressive growth plans and launching the full fledged web portal is one of the steps in that direction. Based upon the market requirement the company will invest in more resources. Johnnie.hr has professionals who handle different languages and work profiles within the entire spectrum of transport services offered by the company. Mr. Kazija said that the business volumes are set to grow and www.johnnie.hr is well prepared to handle the additional requirements. Most of the customers that used croatia transfers over the past years, have given a positive feedback about it.

Croatia can now be rated as one of the Top tourist destinations because of the tourist influx has increased in the recent years. As the passengers have the facility for booking the tickets online with low cost airline companies like Ryan Air, Sky Europe or Germanwings, they can book Croatia transfers tickets in advance without worrying about the tourist season rush when the taxis are unavailable or expensive at the airport. The website of the company is already online for a certain period of time but it is still witnessing new flows of traffic every month. It has all the information regarding airport pick ups and taxi services. The site gives detailed information about all the transfer services provided by the company. So whenever you are in Croatia and need transfers, it would be a great idea to go through this site, get knowledge about the services and then make arrangements to reliable and affordable **Croatia transfers** ahead of time.

In an informal chat with journalists he was seen discussing the overall business atmosphere and the Internet business scenario. The press meet ended with a cocktail party and dinner for all the journalists and critics.
